Introduction to training videos

Hello, on the behalf of the State of Arizona Information Services Division, ADOA Information Security, we welcome you to view three cyber security awareness training videos.

Situation One – First Video	Daily Exposure – Judy, Judy, Judy  Information Security Best Practices
Situation Two – Second Video	Fun and Games  Information Security Best Practices
Situation Three - Third Video	Thanks for Being so Careless  Information Security Best Practices

The scenarios that you will see in this training session will provide you with helpful information and advice on best cyber security practices. Each of us impacts the effectiveness of our organizations cyber security. Something as seemingly innocent as having an unattended lap top sitting on the desk can be an open invitation for others to do us harm.

Cyber security depends on each of us and is only as strong as our weakest link. By knowing the proper procedures and practices for preventing an incident as well as the proper steps to take if an incident occurs, you will be able to help ensure that the impact on cyber security is in fact a positive one.

And we must remember that in regard to cyber security our work is never done. Each day represents a new opportunity for us to protect information in our care. We must never become complacent. We must practice good cyber security habits and serve as examples for others to follow. Our vigilance on a daily basis is what will ensure our success.

Thank you for making a commitment to learning more about cyber security measures. We trust you will find this training a valuable resource.

Thank you very much,

ADOA Information Security
